Heavy Rain	Light rain	Sunny intervals	Light rain showers	Heavy rain showers	Light rain showers (night)
Precipitation probability					
50%	40%	20%	40%	40%	30%

Forecast for Wednesday 20 Sep 2023

Weather: Outbreaks of rain, occasionally heavy, will clear away by mid-morning. Then the day will see bright intervals and a few passing showers. Showers will be most frequent and occasionally heavy this afternoon and evening with a chance of thunder.

Chance of cloud-free hill tops above 800m: 70%

Low Cloud and visibility: Poor in extensive low cloud down to 500 to 700 metres at first, this lifting and breaking to patches down to 800 metres by mid-morning with much improved visibility. Some patchy cloud around 900 metres in the afternoon but many summits free of cloud.

Freezing Level*	2900m	2500m	1800m	1800m	1600m	1500m	1400m

**Level above which ground is expected to be frozen/snow is expected to settle.*

Met Office Aberdeen Meteorologist's View

Gales, or even storm force summit winds across the highest tops of the southern Cairngorms, will lead slow progress and a risk of being blown over. Drenching conditions will also develop in any rain along with notable wind chill.

Forecast for Thursday 21 Sep 2023

Weather: After a bright start in the south there will be a fair amount of cloud through the day with showers or occasionally longer spells of rain. Very windy on the summits with notable wind chill.

Maximum wind: Southwesterly winds average speeds of 30 mph with gusts to 40 mph

Chance of cloud-free hill tops above 800m: 50%, best chance in the south first thing in the morning

Low Cloud and visibility: Poor in areas of cloud down to 700 to 900 metres through the day, this most persistent across the west of the area

Temperature: **Glens:** Plus 6 rising to 16 Celsius
At 800m: Plus 6 Celsius
Freezing level: Above summits
